GPA Conversion Guidelines

This document outlines our official GPA calculation rules for international reference.

1. Score Conversion (to 0–100 scale, X_{ij})

All scores are first converted to a 0–100 scale:

- Hundred-mark (0–100): Direct score
- Two-grade: P (Pass)=80, F (Fail)=0
- Five-grade: A=95, B=85, C=75, D=65, F=0

2. Single-Assessment Grade Point

For the j -th assessment of Course i :

$$Y_{ij} = \begin{cases} \frac{X_{ij}}{10} - 5 & (60 \leq X_{ij} \leq 100) \\ 0 & (X_{ij} < 60) \end{cases}$$

Example: $X_{ij} = 95$ (A) $\rightarrow Y_{ij} = 4.5$

3. Course GPA

Weighted average for 1 course (multiple assessments allowed):

$$GPA_i = \frac{\sum_{j=1}^{k_i} Y_{ij} Z_{ij}}{\sum_{j=1}^{k_i} Z_{ij}}$$

- Z_{ij} : Credits of the j -th assessment for Course i
- k_i : Number of assessments for Course i

4. Overall GPA

Comprehensive GPA across eligible courses:

$$GPA_{Total} = \frac{\sum_{i=1}^n \sum_{j=1}^{k_i} Y_{ij} Z_{ij}}{\sum_{i=1}^n \sum_{j=1}^{k_i} Z_{ij}}$$

- n : Total eligible courses

5. Exclusions from Overall GPA

- Two-grade (Pass/Fail) courses
- General electives (non-core)
